EDUCATION

Wayne State University

B.S. in Computer Science

Detroit, Michigan

Expected Graduation, December 2025

- **GPA:** 3.71/4.00, *Dean's List*
- **Related Coursework:** Computation in Python, Data structure and algorithm, C++, Engineering Design (Simens NX), Object- Oriented Programming (C++), Java Programming, Technical Writing and Presentation, Discrete math and structures, Applied Statistics & Probability, Calculus, Linear Algebra, and Physics

SKILLS

Programming: C++, Python, HTML/CSS, SNAP, Java, and JavaScript

Tools: Simens NX, Visual Studio, VSCode, MS Office, PyCharm, Jupyter Notebooks, AutoCAD, WireShark

OS System: Windows, Virtual Lab, Ubuntu

PROJECTS

Pomodoro Timer Web Application for Enhanced Productivity

March 2024

Personal Project

- Developed a Pomodoro Timer web application using JavaScript, HTML, and CSS to enhance time management and productivity, integrating a background music player for suitable user experience.
- Implemented customizable settings for timer duration and background images, providing a personalized and engaging user interface.

Interactive Discreate Logic Puzzle Game

October 2023 – December 2023

Team Member

- Developed logic puzzle game using Python's 'tkinter' library and discrete math concept, showcasing proficiency in GUI development
- Implemented game logic functions for puzzle generation, checking rows and interactive puzzle display
- Designed an engaging user interface with input validation, error handling, and a reset feature, demonstrating a keen on user experience

Exploratory Data Analysis and Efficiency Assessment of the Auto Dataset

November 2022 – December 2022

Team Member (Lead)

- Analyzed auto dataset using Python's libraries such as matplotlib, statistics, and csv for data cleaning and statistical analysis. Identified and managed outliers, generated correlation plots, and conducted Pearson correlation for key metrics
- Developed an efficiency assessment function and effectively communicated insights through data visualization

Windmill Design and Modeling using Simens NX (Course BE1200)

March 2022 – April 2022

Team Member

- Spearheaded the design and modeling of windmill using Siemens NX CAD software, demonstrating correct mathematical assessment and technical proficiency
- Collaborated with a multidisciplinary team to ensure the seamless integration of aerodynamics and structural integrity
- Applied advanced features in Siemens NX to create detailed 3D models, optimizing for performance and efficiency and produced engineering documentation of the project

WORK EXPERIENCE

Outlier AI

Remote

Technical writer (Freelancer)

December 2019 – Current

- Technical writer for AI writing tier determining and training AI on ethical guidelines for sensitive content, ensuring compliance and accuracy in AI-generated outputs

ACTIVITIES AND LEADERSHIP

Wayne State Cyber Defense Club

Detroit, Michigan

Member

September 2023 – Current

- Actively participated in the annual event, Fix-IT2023, where I volunteered to troubleshoot and resolve hardware and software issues for students and community members.
