SUMMARY

Frontend/full-stack Software Engineer and Computer Science graduate (GPA 3.72/4.0) with experience building React/TypeScript web applications and Python/Flask backends, plus hands-on AI evaluation and software QA work. Seeking a Software Engineer role to build and ship production web applications.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, SQL, HTML/CSS
Frameworks & Libraries: Angular, React, Vite, Tailwind CSS, Chart.js, Mapbox, Framer Motion
Backend & Cloud: ASP.NET Core, Node.js, SignalR, Dapper ORM, Flask, Firebase, RESTful APIs, TensorFlow, AWS (S3, EC2)
Tools & Practices: Git, GitHub, VS Code, Android Studio, Linux, Agile, debugging, end-to-end testing

EXPERIENCE

Buildward — Software Engineer (Part-time) Warren, MI | Aug 2023 – Feb 2026

- Developed a responsive user web application using JavaScript and Tailwind CSS, improving customer browsing experience.
- Built a real-time chat widget using Tawk.to API, enabling direct communication between business owners and customers.
- Integrated JWT-based authentication using Firebase, securing user access for 30+ user accounts.
- Conducted code reviews and shipped updates through Git using an Agile pull-request workflow on a regular release cycle.
- Deployed the Application on AWS S3 and EC2 for cloud-based hosting and availability.

Urban Science (Capstone Project) — Software Engineer Detroit, MI | May 2025 – Aug 2025

- Built a real-time survey web application in Angular, ASP.NET Core, and SignalR, designed to support 1000+ users with admin-managed survey groups.
- Integrated the Mapbox API to build a live 3D globe that zooms and rotates to display each survey response's location in real time, plotting 40+ responses across cities worldwide.
- Developed a real-time analytics dashboard using Chart.js to visualize 40+ survey responses, average scores by product, and NPS metrics as they arrived.
- Optimized backend performance for high concurrency using Dapper ORM and optimized SQL queries, sustaining sub-1-second response times and 200ms real-time updates.

Handshake (Contract) — AI Trainer and Auditor Remote | Oct 2025 – Jun 2026

- Developed automated fail-to-pass test cases to evaluate AI model performance on real-world codebases.
- Annotated and evaluated multi-modal AI outputs across text, image, video, and audio for accuracy and quality.
- Improved AI performance on voice-chat interactions through model comparison, annotation, and structured feedback.
- Designed quality-assurance processes that strengthened data integrity across the model training pipeline.

Outlier AI (Contract) — Technical AI Writer Remote | Mar 2023 – Apr 2025

- Authored technical guidelines on AI ethics, ensuring compliance for sensitive content.
- Evaluated and ranked AI chatbot responses for accuracy, instruction-following, and completeness, providing structured feedback that improved model performance.

PROJECTS

Windows 11-Style Interactive Desktop Portfolio React, Vite, TypeScript, Framer Motion | Jan 2025 – Apr 2025

- Built a fully interactive Windows 11 desktop simulation with draggable windows, taskbar, Start Menu, and context menus.
- Engineered 10+ custom components including a File Manager, Music Player, Photos Gallery, and in-app PDF viewer.
- Live demo: iftekhar-desktop.netlify.app

Stock Price Prediction App Python, Flask, TensorFlow, Chart.js | Oct 2024 – Dec 2024

- Built a full-stack web app with a Flask backend and interactive JavaScript frontend for real-time stock prediction.
- Trained a two-layer LSTM model on historical data using a 60-day sliding window, optimized with Adam and MSE loss.
- Deployed the model in Flask, letting users input tickers and compare predictions on interactive graphs.

EDUCATION

Wayne State University — B.S. in Computer Science Detroit, MI | Aug 2025
GPA: 3.72/4.0 | Dean's List
Relevant Coursework: Software Engineering, Deep Learning, Web Development, Data Structures, App Development, Database, Operating Systems, Computer Architecture, Cybersecurity, Engineering Design, Applied Statistics, Discrete Math
