EDUCATION

Wayne State University

Detroit, Michigan

B.S. in Computer Science

Expected Graduation, December 2025

- **GPA:** 3.71/4.00, *Dean's List* | *Arthur Carr Scholarship* | Gold Scholarship
- **Related Coursework:** Deep Learning, Software Engineering, Algorithm Design & Analysis, Mobile App Development, Database Management System, Operating Systems, Computer Architecture, Web Development, Data Structures & Algorithms, Object-Oriented Programming (C++ & Java), Engineering Design (Siemens NX), Applied Statistics & Probability, and Discrete Math

SKILLS

Programming: Python, C, C++, Java, JavaScript, HTML/CSS, SQL

Tools: Android Studio, Siemens NX, Visual Studio, VSCode, GitHub, PyCharm, Jupyter Notebooks, MS Office, AWS

Frameworks and Libraries: Flask, TensorFlow, Keras, CustomTkinter, Chart.js

OS System: Windows, Ubuntu, Kali Linux

PROJECTS

Stock Price Prediction App | Python, Flask, JS, HTML/CSS, TensorFlow, yfinance, and Chart.js

February 2025 - April 2025

- Built a full-stack web app to predict stock prices using a Flask backend and an interactive JavaScript/HTML/CSS frontend
- Trained a two-layer LSTM model on normalized closing prices from yfinance, using a 60-day sliding window and optimizing with MSE loss and the Adam optimizer
- Saved the model using Keras and deployed it in Flask, enabling users to enter tickers and view real-time predictions versus actual trends via interactive Chart.js graphs

Employee Management System (Group Project) | Python, CustomTkinter, AWS S3, PIL, JSON, SMTP

Oct 2024 – Dec 2024

- Collaborated on building a full-featured desktop application for employee and job management, implementing core functionalities like cloud-based data storage using AWS S3 and a CustomTkinter GUI
- Personally contributed to features such as employee authentication, password hashing, job posting interface, and JSON-based database operations
- Integrated image processing with base64 encoding, implemented email-based account verification, and ensured user-friendly interactions across Employer and Employee dashboards

Personal Portfolio Website | HTML, CSS, JavaScript, and Particle.js | [LINK](#)

May 2023 – July 2023

- Created a responsive personal website with animated Particle.js background and smooth navigation to highlight projects and skills
- Developed an interactive contact form with real-time validation to enable collaborator outreach

Pomodoro Timer Web Application | HTML, CSS, and JavaScript | [LINK](#)

January 2024 – March 2024

- Created a web-based Pomodoro Timer with customizable durations, background music, and visuals using JavaScript and responsive design

WORK EXPERIENCE

Outlier AI

Remote

AI Ethics and Technical Writer

December 2023 – Current

- Technical writer for AI, determining and training AI on ethical guidelines for sensitive content, ensuring compliance and accuracy in AI-generated outputs
- Evaluate and compare AI chatbot model responses, ensuring accuracy, instruction-following, and completeness

Rainbow Grocery

Hamtramck, Michigan

Sales Assistance Volunteer

July 2019– August 2023

- Priced and catalogued goods, delivered quality customer service for Rainbow Grocery

ACTIVITIES AND LEADERSHIP

Wayne State Cyber Defense Club

Detroit, Michigan

Member

September 2023 – Current

- Actively participated in the annual event, Fix-IT2023, where I volunteered to troubleshoot and resolve hardware and software issues for students and community members.
